The Wellbeing of Future Generations Act 2015

This is a law about improving life in Wales for people now, and in the future.

To achieve the aims of this law, we must:

- Think about how our decisions might impact people in the future.

- Work better with people, communities, and other organisations.

- Work together to stop problems like **poverty**, **health inequality** and **climate change**.

Poverty is when someone does not have enough money to live on.

Health inequality means people don't always get equal chances to have good health. For example, maybe because of where they live.

Climate change means the change of the earth's temperature and weather conditions. It is caused by things like oil and gas.

We want organisations to work better together.

We want organisations to think about how their work fits in with other work that is going on.

In your application please think about these things.

Please explain your plans for now, and the future.
We want to see how you plan to work with others.
